SightSpan's Online Training Program

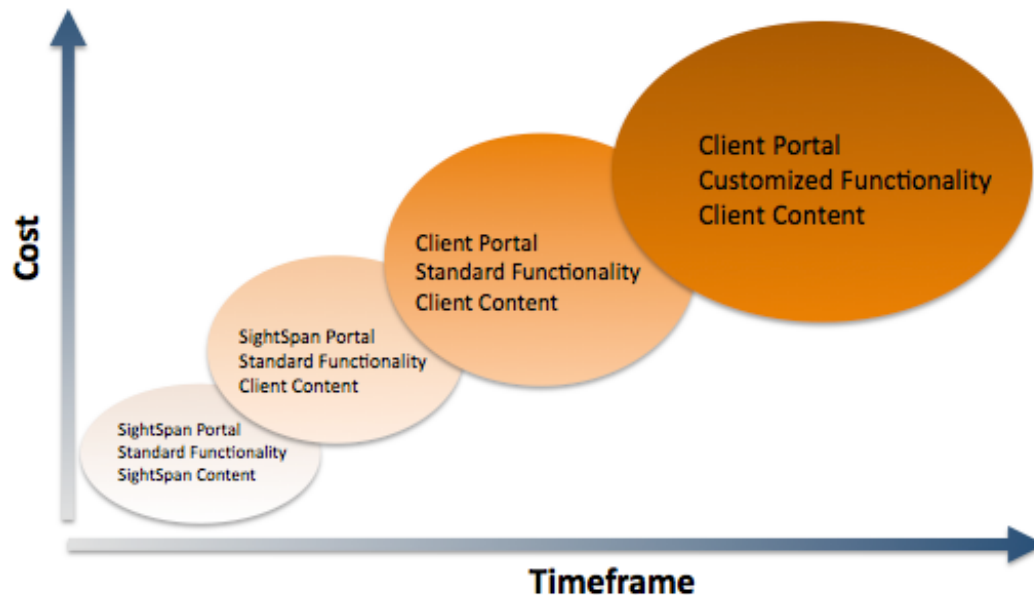

SightSpan's Online Training Program provides an e-learning solution to all of your financial institution's regulatory and mandatory employee and executive training needs. With numerous courses to select from, each of the courses and exams are comprehensive and compliant with their respective training requirements. Once the course material is reviewed and understood, the trainee may then take the exam and results are available for review immediately. When the trainee passes the exam, the SightSpan Online Training Program Certificate of Examination is generated and can be downloaded and printed for records.

Features & Functions	The SightSpan Difference
Centralized and standardized employee and executive training	The Online Training Program provides multi-tiered access to each of the courses and exams your company subscribes to. Each trainee, whether a part time analyst, senior management or board executive, is provided (via email) their login credentials and any relevant information they need to complete the course(s) and exam(s).
Unlimited courses and exams	Each company can subscribe to as many courses and exams as required or needed. Courses and exams are designed to meet the industry standard training requirements across all financial industry marketplaces including banking, Money Service Businesses, prepaid card services, payment processing and foreign exchange companies.
Management control and tracking	Each financial institution can opt to control and monitor their own training platform or have it managed by SightSpan. System administrators can manage user settings, subscribe and unsubscribe employees to/from courses and exams, create training status reports, send course specific email announcements to selected or all employees, and review and manage employee's Certificates of Examination.
Flexible design with multiple levels of customization	SightSpan's Online Training Program has various levels of customization to select from. Depending on the needs of your company, the online training platform, process, content, look/design and access can be customized.

Customize *your* Online Training Program

SightSpan understands that an online training solution is not one size fits all, and that the needs of each company differ based on the industry's training requirements, operational structure, number of employees and company policies. Therefore, the Online Training Program offers a sound training platform that is flexible, scalable and customizable in order to meet your company's current and future training requirements.

SightSpan's Online Training Program can be customized at multiple levels. Customizable aspects include the training site domain, employee/trainee management, course content, certificate details, and exam coverage, format and passing requirements. It's your training, you decide.
