Securely Share, Sync and Store Large Files in the Cloud

AT&Ts DataAnyplace, powered by ShareFile, and delivered by SightSpan inside of AT&T SSAE 16 data centers, is a secure, cloud-based file sharing and storage solution specifically built for business. Send, receive, sync and store files with anyone, anywhere, using any device!

Easily retain control and security of all users

Provide users instant access to their files, in sync across all of their devices. Enable the business to support working virtually through secure file sharing inside and outside the organization. DataAnyplace also provides IT the control and management required to help ensure security and compliance in addition to full reporting and auditing on file sharing activity.
Sync files across all of your devices

Users can sync their files on all of their devices, including PC, Mac, tablets and smart phones. Access your data whenever you need it, wherever you are. DataAnyplace also works with the tools you already use such as MS Outlook, Windows Explorer, and OSX Finder.

The architecture is fully redundant in its design to offer high availability support to this mission critical service. In addition, we provide 24x7 Helpdesk services for all DataAnyplace customers to make sure you get the support you need, when you need it.

Key Benefits

Mobile access and apps — increase productivity and share documents anytime, anywhere

Easily send large files — save money and time sending and organizing documents

Secure, advanced tracking and multi-access levels — know your document was received, by who, and when

DataAnyplace, powered by ShareFile, is part of SightSpan's private cloud portfolio. This creates an integrated approach as the private cloud we build for DataAnyplace can be expanded to support other services, such as managed VMs, hosted apps, and VDI, all within the context of the same support process and portal!

Business Ready

Built for business — private virtual VMs and storage in an AT&T SASE16 data center enhances security. You know where your data and files are!

- Create online folders — clients only see the folders they can access
- Tracking and alerts to confirm that clients have received files
- Compatible with both Mac and PC
- Customizable security settings

Secure and Compliant

With SightSpan DataAnyplace, powered by ShareFile, you can be confident that your data is sent securely. Data is stored in AT&T SSAE 16 Type II accredited data centers help ensure privacy and security of confidential information.

- Files encrypted in transfer
- Granular folder permissions.

Desktop tools and apps

Desktop Widget

Sync
Synchronize folders within your account...for automatic data updates and backup.

Mobile Tools
Take these capabilities on the go with native apps for smart-phones and tablets

ShareFile Testimonials

"The functionality, feature set and customer service are top-notch!"

– Zack, **Lux Capital**

"ShareFile is perhaps the best tool that we have ever used for our business. We are beyond delighted with it. In addition to being incredibly easy to use, it has saved us time, money, head- aches and created a better relationship with both clients and printers."

– Deborah, **Brio Marketing Group**
